FINANCE REPORTING

Financial reports drill down to fully supported transaction details

Reporting summarized by any field in the chart of accounts, and at any level

Current year, date range, comparative and trend reports

Operating Ledger and Balance Sheet reports, Year to date actuals, commitments and budgets statements, with variance for any period

Document Search feature for transaction details

Online Budget Development and Budget Administration

Integrated security ensures users only see the reports to which they have been granted access

Millennium's **FAST Finance Reporting** provides decentralized self service financial reporting for all account holders, allowing fully supported, drill down access to all accounts for that user. Reports include relevant, timely information for actuals, commitments and budgets, showing where money is being spent and how it compares to approved budget amounts.

The FAST Suite is rapidly becoming the self-service tool of choice for Administrative reporting in the higher education market.

The FAST Suite includes the following features:

TURNKEY SOLUTION

Installation, upgrades, ongoing maintenance are all included as part of the package. This reduces the need to hire or train additional personnel, freeing up staff to work on other projects.

PLATFORM INDEPENDENT

Can be accessed on any operating system such as Windows, Linux, Mac, etc. that are capable of running current mainstream web browsers. Use of a web browser means there is no client software to install and maintain.

REDUCED TRAINING COSTS

If the user knows how to use a web browser, they already know how to use the FAST modules.

REDUCED HARDWARE COSTS

100% Web based access so users do not need to upgrade their hardware to access the system, nor are they forced to conform to a single operating system platform.
