Millennium Professional Services Ltd.

TECHNICAL & IMPLEMENTATION PLANNING SERVICES

Your technology infrastructure provides the foundation of your organization's performance. If your organization needs to augment its IT operations, Millennium Professional Services Ltd. can provide onsite and remote IT services to help you achieve your goals. Our aim is to measurably improve performance at your organization through the strategic application and management of technology.

Through collaborative engagements, we work to align performance and operations with goals set by organizational leaders. We identify the right approach and solution based on your goals and business drivers and assemble tailored services and team to meet these needs. MPSL provides a range of technical and upgrade services.

- Application and Technical Consulting
- Conversion Planning and Migration Services
- Oracle Database Administration and Tuning
- Data Warehousing Design and Implementation
- Web and Application Development
- Disaster Recovery, Business Continuity and Enterprise Architecture Planning

Millennium Professional Services Ltd. (MPSL) has a talented team of highly experienced business analysts, application developers, database analysts, and project managers that can address your needs throughout the entire lifecycle of your project. Our team brings comprehensive expertise in business and technology drivers and leading practices within major business areas, including financial services, healthcare, higher education, and the public sector. Regardless of your business needs, MPSL can help you achieve superior project results for your business.
