
FASTBUDGET

Case: 1907 Status Report - Column wrapping display issue

A FundTransfer with a long approval comment (without spaces, ie url) now wraps to the next line.

Case: 2082 FASTBUDGET - Dev Entry PDF not displaying budget series correctly

Budget series now displays coreectly on exported PDF document. In previous version it was displaying as a number.

Case: 2528 Fund Transfers - Approval History Comments missing

Approval history comments now display on page when re-submitting a previously rejected Fund Transfer

Case: 2608 Banner - Gurfeed_trans_Desc needs to accept 35 characters

"txtComment" substrings modified to accept 35 characters.

Case: 2659 Budget Batch posting - allow posting batches larger than 9999 records

When posting a batch with more than 9999 records, the system will now split into two batches and post with a single header record. The split will occur at the 9000th transaction and the 9001st transaction will be posted with a different batch number.

Case: 2726 Add Internal Clearing Account check to Batch Select

Select Batch query now checks for internal clearing accounts.

Case: 2729 Report Generator - Allow deletion of reports

Resolved in Case 2148

Case: 2730 Report Viewer/Generator

Reports in the Report viewer can now be sorted A-Z. To have this customized at your site please contact Millennium.

Case: 2851 Development with Actuals large column display

Fixed bug on Development with Actuals drilldown where longer column descriptions were wrapping and causing the header not to grow properly.

FASTHR

Case: 1921 FASTHR- add client call to all SP in refresh

The refresh scripts now check for custom client rules.

FASTLEAVE

Case: 2679 View Summary - Leave Summary Datagrid colours

Colours should displayed correctly on the new page. Datagrid has been changed to use a RadGrid.

FASTPCARD

Case: 1813 Cardholder Administration - Allow client customization of sort order

Clients are now able to customize the sort order on the Cardholder Administration page as a site setting.

Case: 2022 Create Batch History detail page

On the Administration menu, a new page has been added and you can now view historic batches.

Case: 2173 Allow client customization of Coding Selector lists

Custom rules can now be applied to the FOAPAL drop-downs throughout the application.

Case: 2712 Update Batch History summary page

See case 2022

Case: 2795 View Batch - Error on edit

Fixed an error preventing transactions from being edited and saved before posting on the Batch Posting page.

FASTPORTAL

Case: 2073 WebHelp - Error when clicking the Profile Info help icon from the desktopdefault page

The help icon on the Profile Info pop-up now works on the main home page, as well as on the home pages for each FAST application.

Case: 2369 FASTPORTAL - User/Role search not returning all records

Bug fixed so that all related records are returned when searching for users by Role

Case: 2588 Cannot see error message on User/Role Assignment page

Bug is specific to Internet Explorer 6. We highly recommend upgrading to the latest browser version.

Case: 2589 Internal ID displayed should be external id

In Site Administration, User/Role Administration now displays External ID in employee search results rather than the Internal ID.

Case: 2618 User Role Assignment - Spriden showing

Resolved in Case 2589

Case: 2624 Budget Series - Development Tab error on load with French

Web Development Tab in Manage Budget Series now displays in French using French profile.

Case: 2664 Searchdropdown - Render issue

Underscore _ character removed from select and deselect icons on search drop down lists.

Case: 2752 ErrorHandler - GetErrorDetails missing error number check

None

Case: 2850 ProfileSettings - Improve role layout

Improved display of the roles that the current user is a member of. Available roles are now display in rows of 3, clearly spacing each role.

FASTRESEARCH

Case: 2636 Grants - XML parsing error when creating a grant as a Temp User

To avoid the parsing error, it is recommended you select yourself as the administrator until you save the grant and have finished working on it (before assigning it to someone else).

Case: 2640 Attributes Query - Export to Excel includes objects from the page

Fixed. No extra objects are exported.

Case: 2652 Change Research PIN assignment in VWSTATEMENTOFACCOUNT_HEADER

Problem of Research PIN not displaying if the PIN was created after the Grant was set up has been resolved.

FASTSTUDENT

Case: 1726 Problem with ctlDataGridSums and Paging

Issue with losing footer information on data grid when viewing record set with more than one page of results has been resolved.

Case: 1844 Class Lists - Column Filters have no effect

Column filters are not implemented on this page by design.

Case: 1920 Personal Info: Page Size = 15, but only 8 records displaying

Working as designed, so images can be displayed.

Case: 2382 Admissions - Drilldown produces error

The Admission Check List drill down is now enabled on the Admissions report.

Case: 2383 Admissions - Error 404 on drill down

On the Admissions report, a new drill down has been added for the Prior College admission criteria.

Case: 2525 Correct data list for subject list filters

Updated the SPSUBJ_LIST query.

FASTWEBREQ

Case: 1895 Add Watermark to PDF's for Requisitions and PO's

Clients can now add a 500px by 500px gif called Watermark.gif to the CLIENT_IMAGES folder if they wish to have a water mark image display on the pdf image of requisitions created in FAST WebReq.

Case: 2527 Errors generated when using font attributes on notes control

Added missing file (MCSLNav_HelpPalette.htm)

Case: 2761 WebReq Status - Error on XML export

Two columns have been renamed to NATES and ATTACH, respectively. Their column widths adjusted from 25 to 50.
