Case: 3488 Re-design Adjusting Entries page

The adjusting entries page has been redesigned with an improved look and feel. With a click of the mouse, you now have these options on the adjusting entries page:

- * Add or edit adjusting entries for a single grant
- * Add or edit adjusting entries for multiple grants
- * View, edit, or reconcile adjusting entries
- * View and purge reconciled adjusting entries

Case: 4597 Generic Form 300

A generic copy of the Tricouncil Form 300 report has been created. Federal logos and agency specific references have been removed as well as the signature block.

Case: 4787 Grants - Chart should pick up display/required settings from webconfig

The "Chart" display settings in the edit popup on the grants form now uses the site's web.config.

Case: 4800 Update RUCL code of [optional] revenue JV offset during budget batch posting

If Research Administration is configured to post budget batches, it can also be configured to post an offsetting revenue entry at the same time. A bug was fixed which used the same RUCL code for each of these two batches. The RUCL code can now be configured separately for each batch type.
