

## **Project Development** **Team Lead**

Millennium Computer Systems Ltd. is a fast-growing Canadian owned software and consulting company specializing in providing administrative software solutions to the higher education market in North America.

Millennium requires a full-time Project Development Team Lead to work with other developers building custom and packaged software for the University and College administrative environments.

You will:

- o Work with Business Analysts, Project Managers and customers to ensure the needs and expectations of the customers are met
- o Be responsible for resolving technical design issues
- o Be prepared to perform roles on more than one project simultaneously
- o Write, or oversee the writing of technical documentation suitable for on-going support of any development work
- o Conduct or oversee unit and systems testing during the development cycle
- o Fix or direct the work on any bugs or enhancements as required by any project or product

You will be:

- o A results oriented, self starter requiring minimal supervision
- o A capable team player working effectively in a fast paced environment
- o A capable programmer in your own right, with strong PL/SQL and web development skills
- o Capable of assisting/mentoring other developers
- o Capable of leading other developers by example
- o Capable of directing the efforts of other developers according to the needs and priorities of the work and the skills of the other developers
- o Capable of leading, directing, and working with other developers in a cooperative/collaborative environment
- o Available to travel throughout Canada and USA

You will have:

- o Experience working with web-based projects
- o Experience with Relational Database concepts and design and be capable within the Oracle environment including:
  - o Oracle SQL development
  - o Oracle 9i / 10g or related SQL experience
- o 1 or more years experience leading development teams
- o Strong written and verbal communication skills along with good oral presentation abilities

Additional skills that would be an asset

- o Experience with / knowledge of, ASP.NET (VB.NET) and Visual Studio.NET and the net 2.0 framework
- o Knowledge of ASP.NET Security (Forms, Windows, LDAP etc)
- o Experience with large ERP systems in Higher Education, ie Sungard Banner / Peoplesoft / Datatel
