

.NET Web programmer - Millennium Computer Systems Ltd

Millennium Computer Systems Ltd is a growing Canadian owned software and consulting company specializing in providing administrative software solutions to the higher education market in North America.

Position Overview

Millennium is looking for a full time [ASP.NET \(VB.NET\)](#) programmer who can work as part of a team of developers in building administrative software packages and also to work with clients building custom web applications in University and College administrative settings.

The position requires:

- 2+ years of developing large ASP.NET applications with Visual Studio.NET and the .NET 2.0 framework
- Intermediate level HTML and CSS
- Working knowledge of JavaScript
- Proven ability to develop cross-browser compliant applications
- Knowledge of the ASP.NET page lifecycle
- Understanding .NET OO design patterns, especially extending existing controls and creating custom controls
- ADO.NET and databinding controls
- Experience with the full software development lifecycle
- Proven ability to design and build .NET software integrated with Oracle 9i
- Proven ability to understand and communicate customer requirements
- Strong written and verbal communication skills

Other items that would be considered an asset:

- Degree in Computer science
- Knowledge of Microsoft ASP .NET AJAX Extensions
- Knowledge of ASP.NET Security (Forms, Windows, LDAP etc)
- N-tiered architecture (Caching, error handling, UI validation etc)
- Web Services, WSE and SOAP
- Experience with Sungard SCT Banner would be an asset
- Possible travel through out Canada and USA
