

## FAST START-UP PACKAGE

FAST Start-up Kits are specially designed for new clients to any FAST Module. The Start-up Kit allows trainers to meet with your key stakeholders and identify target areas for the initial product launch, identify client groups, and assess training needs in order to customize a plan that will best suit your department's start-up requirements. We believe that a successful deployment requires proper training to maximize your investment and put your employees at ease.

The program is tailored around your organizational needs and will offer the best possible value and strongest opportunity to onboard employees, successfully manage the change process and ensure that the launch runs smoothly and supports your employees each step of the way.
